Hack for Social Cause (HSC) | Theme: Governance & Civic Technology

Kya Hai Udesh?

Udesh ek **National Civic Data Platform** hai jo poore Bharat ke har naagrik ko ek hi app mein Central + State ki saari yojanaayein, vikas karya, fund ka hisaab, janpratinidhiyon ki public record, ration ki sthiti aur shikayat ka poora tracking deta hai — **Online + Offline** dono tarike se.

Core Formula: India → State → District → Block → Panchayat/ULB → Ward
Online + Offline | **Only Official Sources** | **No Political Rating**

Kis Liye Hai? Taaki Bihar ka koi bhi naagrik (ya Maharashtra, UP, Kerala, Rajasthan ka) apne ilake ki yojana, kaam, fund aur shikayat ki asli jankari ek jagah pa sake — bina afwah ke.

1. Problem – Kya Pareshani Hai?

Bihar aur poore Bharat mein naagrik ko Central/State yojanaayein, local vikas karya, fund ka hisaab, vidhayak/mukhiya ke kaam, ration distribution aur shikayat ki status ki **sahi, verified aur offline** jankari nahi milti. Data kai portals par bikhra hua hai, kai baar purana hota hai, aur gramin ilakon mein internet ke bina access hi nahi hota.

Kaun Prabhavit Hai?

- Gramin aur semi-urban naagrik, mahilaayein, yuva, gareeb parivar
- Jo yojanaon ka faayda nahi utha paate kyunki unhe pata hi nahi ki kaun si yojana chal rahi hai
- Jo dekhna chahte hain ki unke ward mein road, paani, bijli ka budget kahan gaya

Key Gaps:

- Ek unified hierarchical view nahi hai (State → Ward)
- Offline access nahi hai
- Accountability loop kamzor hai (shikayat kahan atki hai pata nahi chalta)
- Data scattered + unverified sources se confusion

2. Solution – Udesh Kya Karta Hai?

1. Unified Hierarchical View

India → State → District → Block → Ward. Sab yojanaayein, kaam, fund aur pratinidhi ek dashboard par.

2. Only Official Source-Linked Data

Har jankari ke saath Source + Last Updated Date + Official Link. Koi afwah nahi, koi political rating nahi.

3. Online + Offline First

Poora app bina internet ke kaam karta hai. Gramin Bihar aur low-connectivity areas ke liye perfect.

4. Complete Accountability Loop

Yojana + Days Left | Vikas Karya | Fund Tracker | Ration Monitor | Geo-tagged Shikayat + Escalation path.

3. App ke Mukhya Features (Detailed)

3.1 Mere Liye Yojanaayein (Schemes)

- Central + State ki saari yojanaayein ek list mein
- Status: Active / Closed / Coming Soon
- Kitne din bache hain application ke liye + last date
- Kitna faayda milega + eligibility (simple language mein)
- Application kahan karein + current status
- Har yojana par Source link + last updated date

3.2 Sarkar ne Mere Kshetra Mein Kya Kiya (Development Works)

- Road, Naali, Paani, Bijli, School, Aspatal, Aawas, Bridge, Rozgar
- Kitna budget approved | Kitna kharch hua | Kitna bacha
- Status: Proposed / In Progress / Completed / Delayed
- Shuru hone ki date + expected/actual completion
- Official source document/portal link

3.3 Fund Tracker

- Kitna fund kis yojana se aaya
- Kis kaam ke liye aaya
- Payment/kharch ka available record + supporting documents

3.4 Janpratinidhi Jankari

- Mukhiya/Sarpanch, Vidhayak (MLA), MP – jahan official data available ho
- Kshetra + karyakalin
- Publicly available kaam / prashn / vikas records
- Agar koi charge/case hai to sirf official/reliable record + source ke saath (App khud ‘accha/bura’ rating nahi deta)

3.5 Ration Nigrani

- Fair Price Shop ki jankari
- Available government distribution records
- Ration related shikayat karne ka option

3.6 Shikayat Kendra (Complaint Centre)

- Flow: Problem → Photo/Video → Location → Department → Submit
- Turant unique Complaint Number milta hai
- Status: Submitted → Received → Under Process → Resolved → Closed
- Agar time par action nahi hota to ‘aage kis adhikari/department ko bhejni hai’ ki jankari
- Central ya State level tak tracking

4. My Area Dashboard – Sabse Badi Feature

Example: **Bihar** → **Patna** → **Phulwari Sharif** → **Ward 5**

Card	Kya Dikhega
■ Mere Liye Yojanaayein	Applicable schemes + days remaining
■■ Chal Rahe Vikas Karya	Road, paani, bijli etc. jo chal rahe hain
■ Poore Hue Kaam	Completed projects with cost & date
■ Fund Tracker	Approved vs Spent (source linked)
■ Paani Projects	Handpumps, pipelines status
■ Bijli Karya	Poles, transformers, new connections
■ School / Aspatal	Infrastructure & services
■ Meri Shikayatein	Submitted / Pending / Resolved
■ Janpratinidhi	Mukhiya, MLA, MP + public records

5. Kaise Kaam Karta Hai? (How it Works)

- Data sirf official government sources se aata hai (data.gov.in, State portals, RTI, LGD codes)
- Har record ke saath Source + Last Updated + Official Link hota hai
- Offline-first design: critical data phone mein save rehta hai, internet aate hi sync hota hai
- Hierarchical geo-model: aap apna State → District → Ward select karke apna dashboard dekhte hain
- Shikayat geo-tagged hoti hai aur status tracking ke saath escalation path dikhta hai
- App kabhi bhi kisi neta ko ‘accha/bura’ nahi kehta – sirf facts aur official records dikhata hai

6. Kisko Faayda Hai? (Who Benefits)

Stakeholder	Kaise Faayda
Naagrik (Primary)	Yojanaon ka sahi faayda, local kaam ki transparency, shikayat ka tracking
Mukhiya / Sarpanch	Apne kshetra ke data ka clear view, better planning
Vidhayak / MP	Public records transparent, accountability badhti hai
District Administration	Real-time feedback loop, better monitoring
State / Central Govt	Scheme uptake badhta hai, leakage kam hota hai
NGOs / Media / RTI activists	Verified data ek jagah milta hai

7. Poore Bharat Ko Kaise Faayda Milega?

Udesh sirf Bihar tak limited nahi hai. Iska architecture **plug-and-play** hai. Koi bhi State apna data connector laga kar same hierarchy mein aa sakta hai. Isse poore desh mein:

- Yojanaon ka uptake badhega (logon ko pata chalega ki unke liye kya available hai)
- Local level par corruption aur leakage kam hoga (fund tracking se)
- Shikayat ka system strong hoga (escalation path clear hoga)
- Digital divide kam hoga (offline pehle se kaam karega)
- Naagrik aur sarkar ke beech vishwas badhega
- Viksit Bharat 2047 ke vision mein transparent governance ka strong pillar banega

8. Design Principles (Kyun Bharosemand Hai)

- **Source First** – Har data point par official source + date + link
- **Political Neutrality** – App kisi ko accha/bura nahi kehta, sirf record dikhata hai
- **Offline First** – Bina net ke bhi core features kaam karte hain
- **Simple Language** – Hindi + English + regional language support
- **Low-end Device Friendly** – Saste Android phones par bhi chalega
- **Trust by Design** – ‘Data available nahi hai’ bhi honestly dikhaya jata hai

9. Technical Approach (Short)

- **Frontend:** Flutter (Android/iOS) + PWA – Offline-first (Hive/SQLite)
- **Backend:** NestJS / Node.js + PostgreSQL + PostGIS
- **Data:** ETL from data.gov.in, State portals, RTI + OCR
- **AI:** RAG for scheme matching + NLP for complaint routing (core data hamesha official source based)
- **Maps:** MapLibre + OpenStreetMap
- **Security:** OTP + optional Aadhaar e-KYC, encrypted storage

10. Rollout Plan

Phase 1 (0-6 months) – Bihar Pilot
Selected districts, Core modules (Schemes + Works + Complaints), Test & improve
Phase 2 (6-18 months) – Full Bihar + 2-3 States
All districts of Bihar, Fund Tracker + Ration module, Expand to 2-3 more states
Phase 3 (18+ months) – National Platform
All States & UTs, Plug-and-play state connectors, Full feature set across India

11. Expected Impact (Summary)

- Scheme uptake mein vriddhi
- Local level par fund leakage mein kami
- Shikayat redressal ka time kam hoga
- Naagrik-sarkar ke beech trust badhega
- Digital inclusion (offline pehle se)
- Data-driven local planning possible hoga

Udesh = Real Data + Official Source + Public Trust

Yeh app kisi party ya neta ka prachar nahi karta.
Yeh sirf naagrik ko uske adhikar, uske kshetra aur sarkar ke kaam ki sahi jankari deta hai.

Jagrook Naagrik = Sashakt Loktantra
